

Seat Testing

Millbrook's seat test laboratory in the UK delivers prompt, dependable testing to national, international and OEM standards and bespoke test requirements.

Millbrook's experienced engineers provide a broad range of high quality services, from ingress / egress, pressure-mapping and head impact to airbag deployment and KLTs, to deliver the critical seat testing required by OEMs, Tier 1s and their supply chains.

Typical Applications

- Trim Kuka robots & pressure mapping
- Live ingress / egress
- DOS (driver occupant simulation)
- Jounce
- Climatic
- Head impact
- Airbag deployment
- HVAC
- Heated seats
- Durability
- KLT
- Seat strength tests (sled)
- Seatbelt anchorage (SBA)
- Seat back displacement (moment arm)
- GOM camera / Faro arm
- Wiring loom / harness testing
- Power functions / performance
- H-Point manikins
- Mechanical fatigue
- Vibration durability
- MAST
- Squeak and rattle
- Lumbar
- Airbag deployment including high speed cameras
