

Real Driving Emissions

Millbrook provides accurate and repeatable emissions data on the test track and on the road.

Millbrook is approved as a Real Driving Emissions (RDE) test facility by the VCA and as a designated RDE Technical Service for type approval by the Dutch automotive authority, RDW.

As well as testing against the vehicle emissions Regulations Millbrook's equipment is used for emissions development, investigations, vehicle air quality evaluations, research and product benchmarking using procedures such as the LowCVP HGV accreditation scheme.

Portable Emissions Measurement Systems (PEMS):

- Manufacturer: Sensors Inc.
- Model: 3 x Ecostar, 2 x LDV
- Measurement capability:
 - 1Hz CH₄, HC, CO, NO_x species, NO, NO₂, O₂, CO₂ and particulate number
 - Dual FID capable to measure simultaneously Methane and total Hydrocarbons (HC)
- Static, bus, HGV, off-highway and passenger car applications supported
